stranded 5/24/15 COA, ME; admit: 5/28/15; died 6/22/15
We’re sad to have lost Mace after a 24 hour period of “crashing” that involved low blood sugar, hyponatremia, fever, an increased WBC and a cloudy eye. Mace died despite IV fluids, Florunef, antibiotics, and dextrose. An acute viral infection is suspected. A necropsy was preformed at WHOI and Herpes PCR testing has been submitted.
