Marine Animal
Discovery Center

Open 10 am – 5 pm

Memorial Day – Labor Day

Weekends & select days
during the year

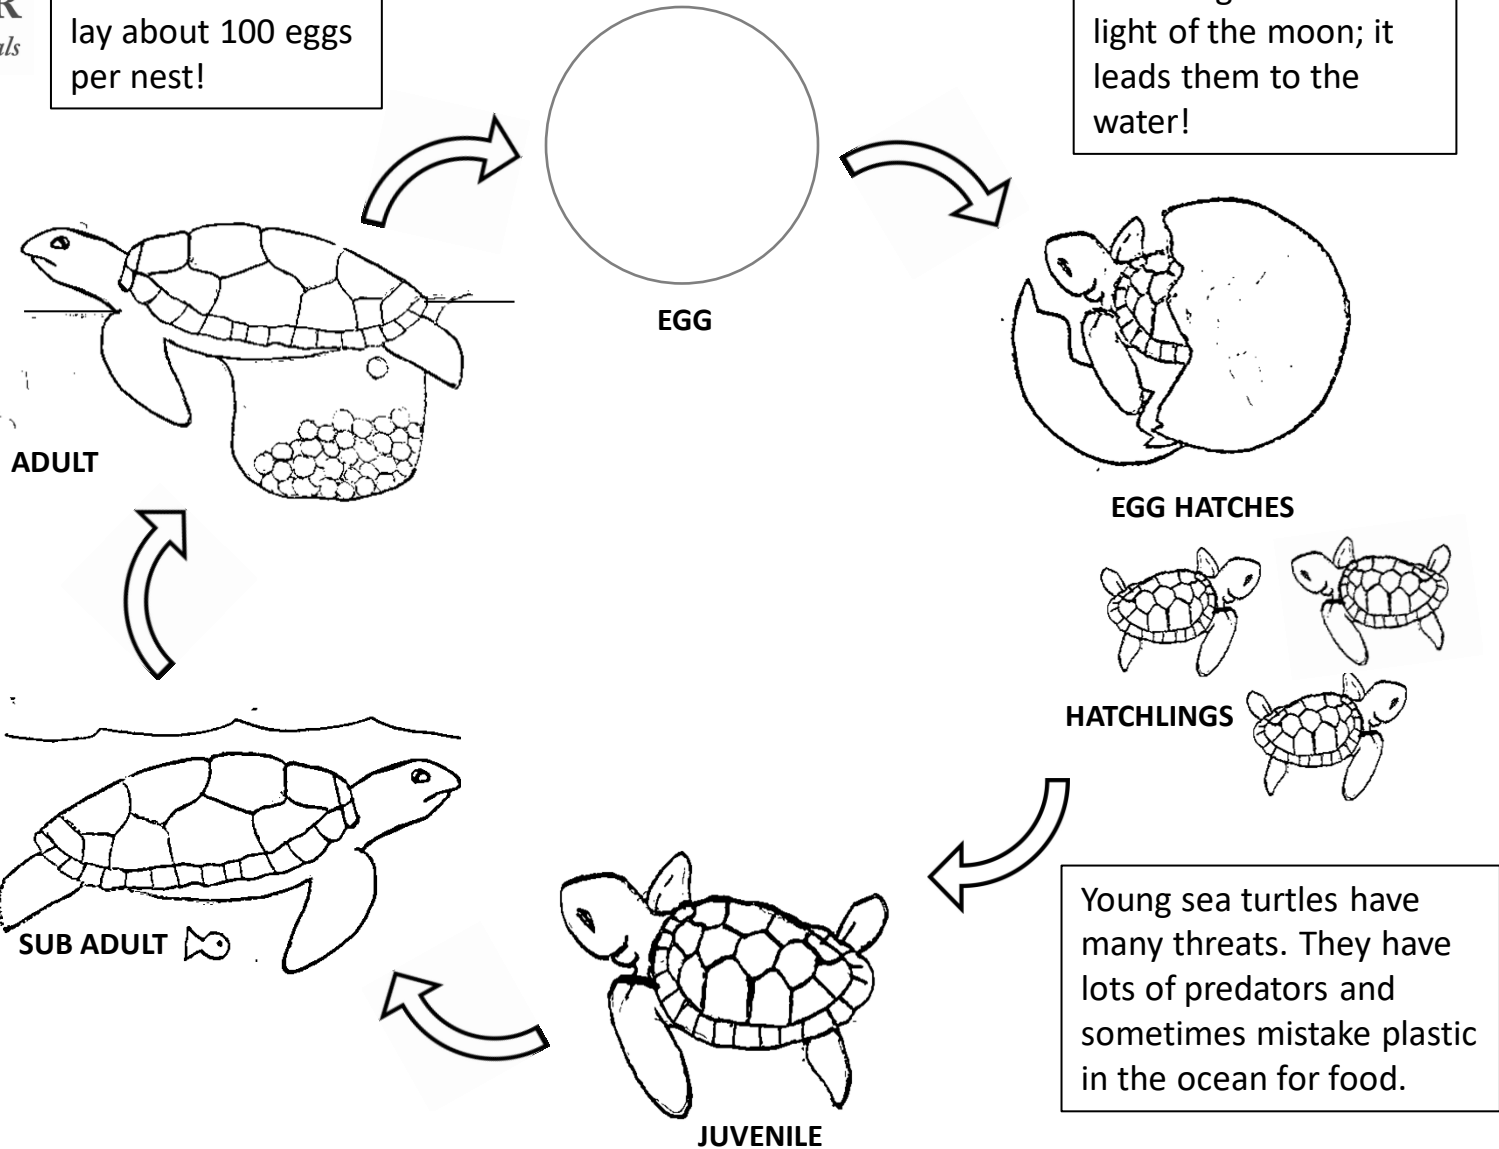

Sea turtles can live
to be over 100
years old!

Sea turtles don't
start
reproducing
until they are
about 25 years
old, then they
are adults.

Sea Turtle Life Cycle

Female sea turtles
lay about 100 eggs
per nest!

Hatchlings follow the
light of the moon; it
leads them to the
water!

Young sea turtles have
many threats. They have
lots of predators and
sometimes mistake plastic
in the ocean for food.
